

EMMANUEL IHENACHO

FRONTEND ENGINEER / PRODUCT-MINDED FULL-STACK DEVELOPER

Owerri, Imo State, Nigeria | +234 704 522 7853 | codewithsleek@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFILE

Frontend engineer who turns product ideas and visual systems into responsive, maintainable web applications. Experienced in Next.js, React and TypeScript delivery across commerce, product discovery and media platforms, with a focus on reusable architecture, clear user journeys, third-party integrations and production reliability.

EXPERIENCE

Freelance Frontend Engineer | Code with Sleek 2024 - Present

- Lead frontend delivery for production client platforms from design interpretation and responsive architecture through API integration, deployment and ongoing maintenance.
- Translate Figma concepts and business requirements into reusable React/Next.js systems with accessible interaction patterns, intentional motion and consistent desktop/mobile behavior.
- Work directly with non-technical stakeholders to clarify product decisions and maintain deployed experiences as business requirements evolve.

SELECTED PRODUCTION WORK

UKRAFT | African crafts e-commerce platform 2025

- Led frontend development and integrated a Next.js storefront with an existing PHP API across six commerce journeys: discovery, configuration, cart, checkout, customer accounts and order tracking.
- Implemented authentication, cart and wishlist state, NGN/USD currency handling with a 24-hour cache, Paystack checkout, product variations, dashboards, Mapbox, editorial content and newsletter flows.

Sampees Global Resources | Product catalogue and lead-generation platform 2024

- Built the responsive frontend and reusable UI architecture around product discovery, quality proof, customer trust and enquiry conversion.
- Integrated LiveChat and analytics, created conversion-focused calls to action and presented three product types, three quality commitments and three customer profiles across production deployments.

Trevor Beats Multimedia | Apps and digital-products platform Current

- Delivered the complete current website engagement: redesign, selected-page development, full frontend implementation and ongoing maintenance for a multi-product media technology brand.
- Structured a dense ecosystem into a responsive experience presenting 17+ published apps and three web platforms with clear product storytelling, commercial calls to action and maintainable content sections.
